

Forars Kaede

A Simpler Method

First start a normal piece of Full Persian weave. Just a short section is all that is needed. It should look like this:

Now insert one ring as shown below (larger ring). I use an AR of 4.25 for my Forars Kaede.

Next turn your weave $\frac{1}{4}$ turn counter clock wise and insert another ring. This ring will go over the ring in the previous step.

Again turn your weave $\frac{1}{4}$ turn counter clock wise and insert a ring

All images and text remain the property of the author and are reproduced here with permission. You must obtain permission from the author to copy and/or distribute this tutorial.

Turn again and insert a fourth ring

You now have successfully done a full rotation of Forars Kaede.

To do Hawkskaede you would start the very same way with a short section of Full Persian. But rings one and three go to the outside as shown in the pictures above. Rings two and four go to the "inside" of the "V" as shown below. This will make the weave lay flat where Forars Kaede will be more round.
