

Renki

Renki is a weave created by Loke. It is a combination of the weave HP 3-1 and HP 4-1. I am using stainless steel rings 1,20mm (18 SWG) with a 19/64th ID. AR ~6.43

1. Start with a section of HP 3-1 as long as you want the finished piece.

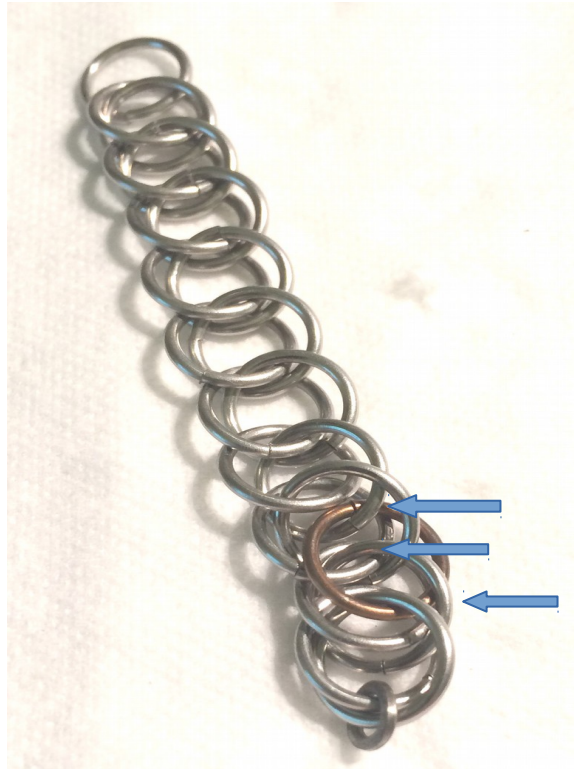

2. If you will notice the rings on the far left in the above illustration is the ring that goes thru the eye and over the top of the next ring. This is very important to know. HP 3-1 goes through one eye only. HP 4-1 goes through 2 eyes.
3. Take your first ring and go through the eye as shown.

Renki

4. In the picture below you will see how the first ring finishes. You have gone thru the bottom eye. Skip one eye and go thru the third eye. This will be the pattern as you progress.

5. The next ring will set the pattern for you. Go through the eye that you skipped with the first ring. Skip the eye used by the first ring and go through the following eye. Your weave should now look like the picture below.
